

COMPANY PROFILE

Aluitalia was founded in the Airport Free Zone in Ras Al Khaima in 2006.

Aluitalia was born from the very successful marriage between Gabriele Tarroni Longinotti and Antonio Cianci, that decided to put together their experiences in technical and financing point of view. Aluitalia was immediately successful. Aluitalia has developed incessantly and today is worldwide recognized as the biggest and most important independent operator in the light alloys in the Gulf Area.

In Middle East Aluitalia has actually a position of consolidated leadership.

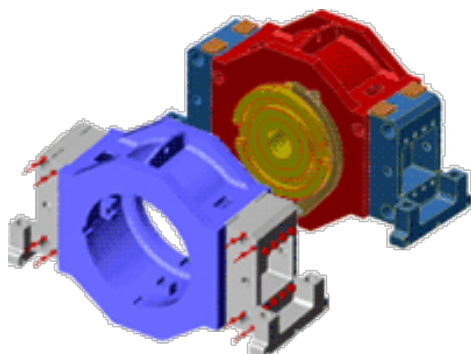

All stages of the production process are represented from the a group of companies composed by TRASMETAL SPA; OMAV SPA; PRESEZZI EXTRUSION SPA; OFFICINE MECCANICHE BRUNO PRESEZZI SPA; COMPES SPA; EIDOS SRL and EMMEBI SRL. Dando grande spazio alla creazione italiana esaltando la nostra rinomata e consolidata tecnologia nel settore dell'aluminio.

Aluitalia ha così unica nel suo genere la possibilità di offrire chiavi in mano una completa fabbrica per l'estrusione e la laminazione dell'aluminio

Aluitalia operates with regional offices in Dubai, Cairo and Casablanca. These have fast and convenient connections to all the Arabic Countries destinations and far-east as well. In fase di costante evoluzione abbiamo fatto nostro lo scopo della soddisfazione dei nostri clienti, i quali vista la qualità e l'ovvio costo elevato della nostra produzione, sono da sempre considerati come un elite in un mercato essenzialmente povero come quello dei metalli leggeri.

We have available trained field electrical engineers and mechanical technicians to provide service in accordance with the customer's request as well as services as a warehouse center for the spare parts to be able to offer quick response and fast delivery.
